## THE JEWISH-CHRISTIAN STUDIES GRADUATE PROGRAM

*Invites educators and other interested individuals to a professional development study day*

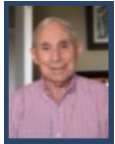

### **Jews and Resistance in France during World War II**

After the Nazi conquest of France in June 1940, the eastern area of Alsace-Lorraine became part of Germany. Northern France and the Atlantic coast were controlled by the Occupation Forces and the rest was governed from Vichy in collaboration with the Germans. At that time there were 350,000 Jews in France; more than half were not French citizens, having arrived from the East after World War I or from Germany after 1933. At first they were more vulnerable than citizens but from both zones 80,000 Jews were deported in 1942 and later; only 2,000 survived the war. Resistance was organized in both zones by Jews and others. The speakers below will examine what important lessons these stories of resistance can teach our generation today at this year's professional development study day.
