Re: Program Review Report - Stillman School of Business
2021-FS-17

Date: July 6, 2021

I am in receipt of 2021-FS-17 Program Review Report of Stillman School of Business, approved by the Faculty Senate at its May 10 meeting. I appreciate the diligent work of the Program Review Committee and my office joins the faculty senate in approving this program for the reasons discussed in the report.

In particular, I note the Committee's observation that Stillman has found a system that encourages continued research, improvement, and mission alignment within a large faculty with a high number of tenured and full professors. I thank the Committee for pointing out how the school has been creating strong partnerships with alumni and with the private sector in innovative ways that will foster continued growth and that will strengthen the school's mission. I look forward to seeing the school meet the challenge of building connections with other units on campus as we implement our strategic plan.
