

Faculty Development Committee Report
May 16, 2022

The Faculty Development Committee closed the “Effects of the Pandemic” survey at the beginning of May. The committee met to determine how to proceed with survey analysis.

Two subgroups were created. One is focusing on the responses from the entire survey population. The second subgroup is focusing on the self-identified demographic groups such as gender, race, and faculty status.

A final report, including quantitative and qualitative themes/frequencies, will be available for the June 2022 senate meeting.

Respectfully,
Grace M. May, FDC chair
